

4th CIRCULAR: INFORMATION AND INSTRUCTIONS

Dear colleagues,

The dates of Rock and Roll: 13th International Symposium on Knappable Materials are approaching, and we are glad to share the **Program** brochure.

GENERAL INFORMATION

Parallel sessions (held in different ZOOM meeting rooms) will host the presentations, and you will also have access to the posters, and the virtual trips of this edition.

Looking to maximize this virtual experience, soon you will receive the **Book of Abstract** and a **link to the 13th ISKM Platform**, a very intuitive tool that will allow you to have an easy and automatic access to all the contents and events you want to assist.

The 13th ISKM events will be recorded and available for the participants during a month (October 2021) to ensure you can access and visualize them. Please, let us know before the 30th September if you do NOT want your participation to be recorded (13iskm2021@iphes.cat).

Program schedule is structured according to CEST time, and even if the Organizing Committee tried to adjust to every participant time zone, we are aware (and regret) that some of you will be unable to 'live' participate in your session.

Below you will find some specific instructions depending on your role and participation in this edition.

PRE-RECORDED PRESENTATIONS (.ppt)

If you will be not able to attend to your programmed oral presentation, please send us (13iskm2021@iphes.cat) your **pre-recorded .ppt presentation (duration: 15 minutes)** before the 30th September, and it will be shown at your programmed time.

ORAL COMMUNICATIONS (.ppt)

If your participation includes an oral communication, please prepare it on **ppt, pps or pdf** format.

You will receive a specific link to your scheduled zoom session, where you should be at least 5 minutes before your programmed presentation to facilitate the work to the session organizers and our technical staff.

POSTERS (and optional videos)

If you are presenting a poster, you should send it before the 30th September (20th September if you participate on our **Student Prize Contest**) to 13iskm2021@iphes.cat.

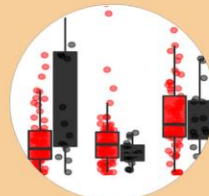

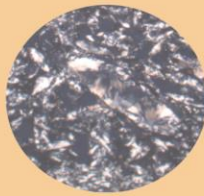

Please, keep in mind the accepted formats are **.pdf** or **.png**, and the **A0** files cannot exceed **10MB**.

You have the option of complementing your poster with an explanatory **short pre-recorded presentation** (5 slides; 5 minutes) in **.mp4** format that cannot exceed **250MB**.

Participants will have access to the Posters (and optional videos) through our platform, and they will be available during the conference days, where you can consult them, leave your comments and questions

Organizing Committee

Rock and Roll: 13th International Symposium on Knappable Materials

4th-7th October, 2021

Multi-scalar Characterization of Raw Materials

directly on each one of them, and they will be addressed and solved by the authors and session organizers during their specific sessions.

SESSION ORGANIZERS AND SPEAKERS (Oral Communication and Posters)

The Rock and Roll: 13th ISKM is going to be a challenging virtual edition, and the Organizing Committee and Technical Services want to minimize possible difficulties.

In a few days, you will receive an invitation to a **previous virtual gathering**, where we will present ourselves, the 13th ISKM platforms, and solve any question or technical issue ahead. So please, try to assist to this meeting (several options will be offered to facilitate a global participation given the different participants location).

ASSISTANTS AND PARTICIPANTS

Please, stay safe! We are hoping to see you all in this virtual edition of the 13th ISKM.

Do not hesitate to contact us if you have any questions or doubts (13iskm2021@iphes.cat).

Let's Rock and Roll!

The 13th ISKM Organizing Committee
