

Rock and Roll: 13th International Symposium on Knappable Materials

Tarragona, Spain
4th-7th October, 2021

Multi-scalar Characterization of Raw Materials

1st Circular ISKM 2021: Call for Sessions

13th International Symposium on Knappable Materials, 4-7th October 2021

Dear friends and colleagues,

We hope that you and yours are well amidst the COVID-19 situation.

The ISKM Organizing Committee invites you to participate in the **Rock and Roll: 13th International Symposium on Knappable Materials**, to be held virtually* in Tarragona from 4-7th October 2021. In addition to the regular subjects, the special theme session selected for the 13th ISKM 2021 is **Multi-scalar Characterization of Raw Materials**.

As with previous editions, this conference will cover all aspects of knappable materials from any culture or time period, from geological origin to procurement, exploitation, and abandonment, including the whole spectrum of analyses for characterizing them at any culture or time period.

The suggested sessions for the conference are the following:

- Multi-scalar Approaches to Raw Materials Characterization
- Lithoteques: Collections of Comparative Raw Materials
- Raw Material Procurement Areas and Strategies
- Stone Tool Production during Pleistocene
- Lithic Technology during the Holocene
- Experimental Knapping on Different Raw Materials
- Use-wear analysis on Knappable Materials
- Territorial Mobility and Ethnography
- Biotic Raw Materials Management

Ideas concerning other themes and sessions are welcome! The deadline for submitting new session themes is **15th February 2021**. The final list of sessions will be announced later, together with the deadline for sending abstracts.

All updates will be announced via the conference website: www.13iskm2021.com

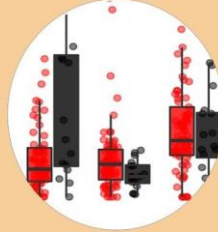

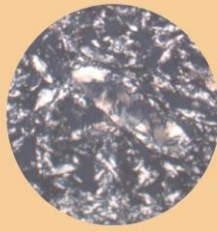

Scientific correspondence address: 13iskm2021@iphes.cat

*The possibility of having an in-person conference will be evaluated up to June 2021, depending on how the situation related to the pandemic develops,

Organizing Committee
